DETAILED ACTION

Information Disclosure Statement

1. The information disclosure statement filed 11/14/2005 fails to comply with 37 CFR 1.98(a)(2), which requires a legible copy of each cited foreign patent document; each non-patent literature publication or that portion which caused it to be listed; and all other information or that portion which caused it to be listed.

Examiner notes that Applicant is correct that the international search report does satisfy the Statement of Relevancy as required by MPEP section 609. Therefore, the references are considered to the extent noted on the search report. Examiner notes that no English translation or English abstract has been presented.

Claim Objections

2. Claim 5 is objected to because of the following informalities:

Examiner asserts that line 2 of claim 5 should read --...configured to detect...-- instead of "...configured to which detect...".

Appropriate correction is required.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

4. Claims 1-6 are rejected under 35 U.S.C. 102(a) as being anticipated by Applicant Admitted Prior Art (hereinafter AAPA).

Claims 1-4 are rejected for the same reasons as discussed in the previous Office Action, mailed on 9/26/2008 (see Response to Arguments below).

Claims 5 and 6 contain similar limitations to those recited in claims 1 and 2 and is rejected for the same reasons of anticipation (see Response to Arguments below).

Response to Arguments

5. Applicant's arguments filed 1/26/2009 have been fully considered but they are not persuasive.

Applicant, on page 6, first paragraph, alludes to the fact that claims 1 and 2 contain "means plus function language". Examiner notes that means plus function language invoking 35 U.S.C. 112 6th paragraph must contain the phrase 'means for' or 'step for'. See *MPEP 2181*. Examiner notes that claims 1 and 2 do not contain means plus function language which would invoke 35 U.S.C. 112 6th paragraph since that phrase is not present.

Applicant, on page 8 of the Response, argues that AAPA does not disclose 'processing status information'. Examiner respectfully disagrees. Examiner notes that although Applicant lists what 'processing status information' may include (stability of a frame sync signal, abnormal status, etc.), Applicant fails to clearly define the 'processing status information'. Examiner is therefore require to, with the broadest possible interpretation in light of the specification, read 'processing status information' as any status indicating information used in the processing of the data. Examiner therefore asserts that the N-divider signal is applicable to the 'processing status information' and

therefore the claimed limitations are met by the AAPA as discussed in the previous Office Action (see also page 3, lines 3-12 in instant application).

In response to applicant's argument that the references fail to show certain features of applicant's invention, it is noted that the features upon which applicant relies (i.e., frame sync signals, state determination circuit, etc.) are not recited in the rejected claim(s). Although the claims are interpreted in light of the specification, limitations from the specification are not read into the claims. See *In re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993).

Furthermore, Examiner notes that the claims are given the broadest reasonable interpretation consistent with the specification. See *In re Morris*, 127 F.3d 1048, 44 USPQ2d 1023 (Fed. Cir. 1997).

Conclusion

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
